REF: Performance profile for Infineum P5960 Additive Technology.

Dear Mr. Ghiyasuddin,

This letter is in response to your enquiry to Infineum with regards to the performance of **Infineum P5960** additive technology (formulations coded **IM2101122-E** - SAE0W-20), and **IM2104428-C** - SAE5W-30). I confirm that this technology is designed for a top-tier Passenger Car Motor Oil. I also confirm that any oil blended according to the approved formulations, IM2101122-E and IM2104428-C *, Including **GP Petrogen Fully Synthetic SAE 0W-20** and **GP Petrogen Fully Synthetic SAE 5W-30**, will meet the performance requirements and approvals listed below. Please note that this statement is no longer valid if you deviate from any part of the **IM2101122-E**, and **IM2104428-C** formulations or correct blending procedures. The above formulations consist of Infineum P5960 at a treat rate of 8.60%, in approved base stocks, viscosity modifier and lube oil flow improver.

- **API SP-RC** – Licensable
- **ILSAC GF-6A**
- **dexos 1 Gen 3**

* For further formulation details contact your Multisol /Brenntag representatives

Please note that above Specifications are all current and valid and therefore oil marketers are strongly recommended to apply for formal license or OEM approvals for their branded lubricant, before making the performance claims. It also should be noted that this letter is not an approval letter for your branded product.

I trust this meets your requirement. However, should you require further information and/or clarification please do not hesitate to contact me or your Multisol /Brenntag representatives.

Your's sincerely,

A. Zareh
